

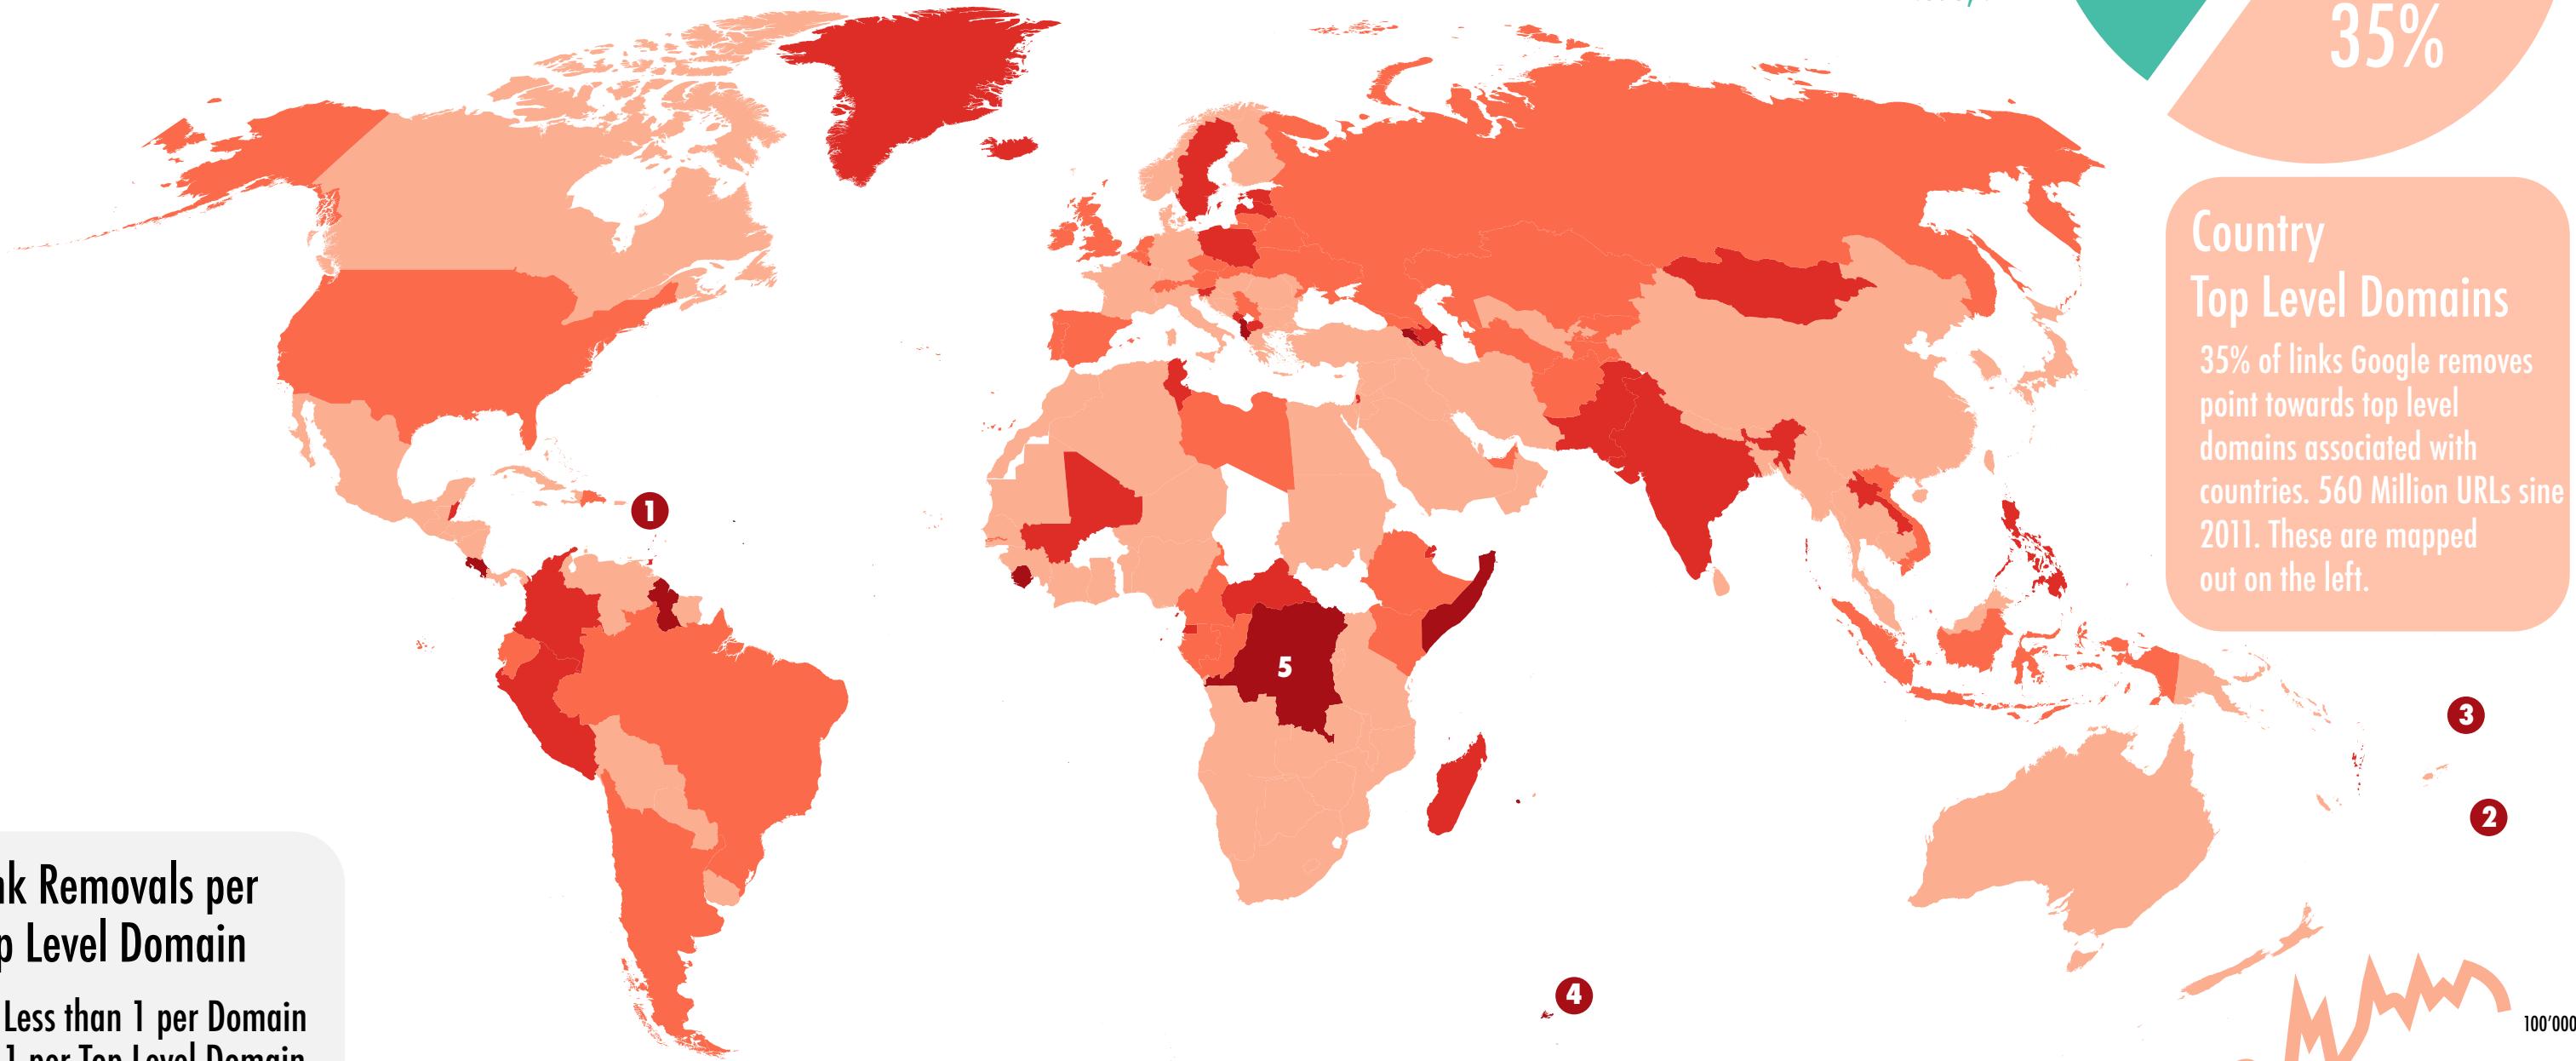

Mapping Google's Dead Links

The Search Engine has removed 1,7 billion URLs since 2011 - the darker the area on the map, the more links were removed proportionately to the number of country domains

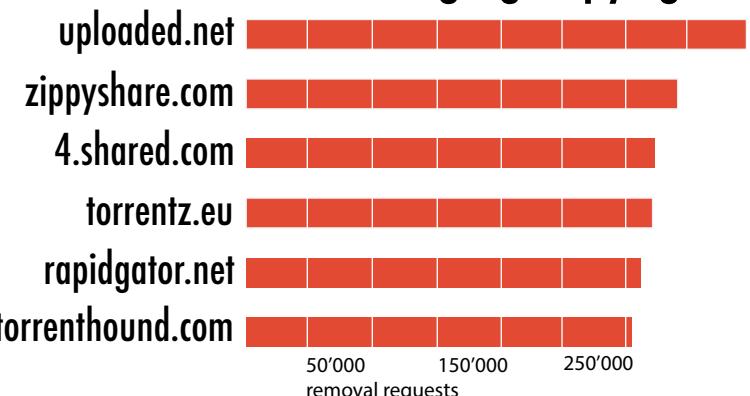

Link Removals per Top Level Domain

- Less than 1 per Domain
- 1 per Top Level Domain
- Between 1 and 10
- Between 10 and 100
- More than 1000

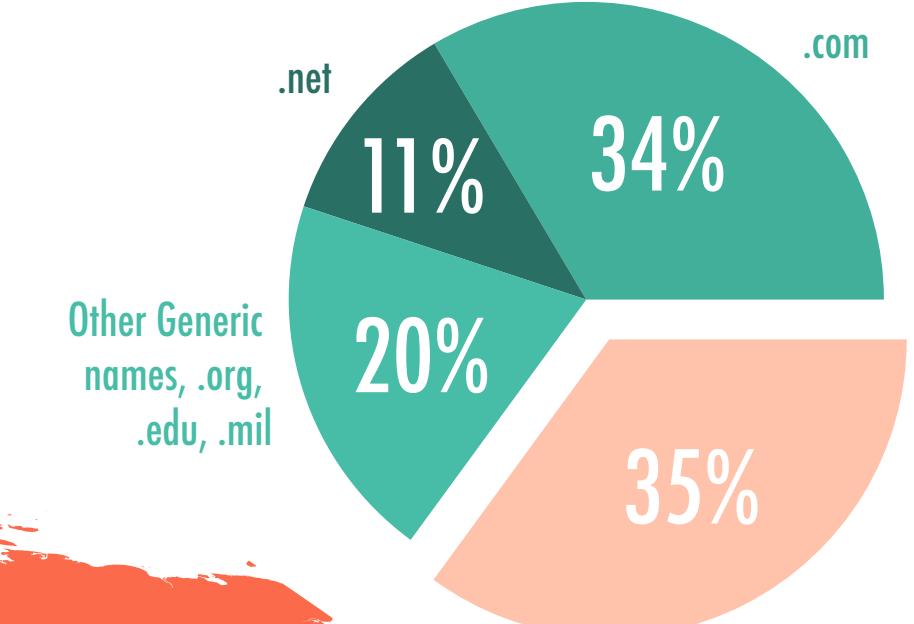

A reading example: Switzerland has approximately 1,6 million registered top level domains ending in .ch. Over the past 5 years Google has removed 9,3 million links to content .ch sites. That is 6 Links per country top level domain. The white countries there was no available data.

Notorious Sites Damaging Copyright

Countries with the most Links removed per Top Level Domain

Country	Domain	Removed Links per TL Domain
